### Education

Bachelor of Law (Hons Degree)  
Bachelor of Commerce  
(Information Systems Hons  
Degree)

**Mr. Hughes has seven years of cybersecurity experience, supporting clients within a broad range of technical problems and specialising in cybersecurity, digital forensics, and incident response.**

Mr. Hughes leverages his in-depth knowledge of forensic technology to assist in solving numerous complex investigations for corporates, solicitors, and high net worth individuals. He advises clients on cyber due diligence, both pre and post acquisition; the maturity of information security programmes; cyber insurance pre-bind risks & loss adjustment; digital evidence for internal and court-driven investigations; cyber, forensic, and regulatory incident response; and information security risk management. Mr. Hughes has managed multiple forensic collections and investigations in response to Civil Search Orders and Delivery-Up Orders (or similar) where data has been securely captured, interrogated, and reported on, as instructed by the Court. He also led a nine-month project assisting the incident response team within a Tier 1 bank. Prior to joining FTI Consulting, Mr. Hughes worked in Alvarez & Marsal's London office for the forensic technology team. In 2014, Mr. Hughes was an Associate at PwC (Cape Town), where his role included forensic technology solutions, including eDiscovery and digital forensics; information security, including vulnerability assessments and penetration testing; forensic investigations; corporate intelligence; and cyber threat assessments.
