Preview Text: **Scattered Spider, Disinformation Campaigns, and More**

## What's Trending

Last year, the notorious ransomware group Scattered Spider targeted and successfully exploited organizations in the financial services industry. In recent months, the group shifted its focus to the retail sector, insurance companies, and most recently the aviation and transportation sectors. The aviation industry is an essential element of global critical infrastructure, and cyber attacks to this sector present not only business risks, but also national security risks. FTI Cybersecurity can help companies in the aviation industry mitigate the risk of ransomware and effectively respond to incidents when they occur. [Learn More >>](#)

## Service Spotlight

### Why It Matters:

Individuals, organizations, and government entities can find themselves the target of disinformation or misinformation campaigns aimed at destroying their brand, reputation, and enterprise value. Dis/misinformation campaigns are less effective when identified immediately, allowing quick counter-actions.

### How FTI Cybersecurity Can Help:

FTI Cybersecurity provides the necessary expertise to identify and unravel these campaigns, producing conclusive findings and strategies to combat and counteract the spread of dis/misinformation. This includes:

- Initial Assessment & Scoping
- Continuous Monitoring & Analysis
- Impact Attribution & Assessment
- Analysis of Leads & Root Causes

### Case Study:

FTI Consulting was engaged by a high-profile individual who was concerned they were being victimized by a targeted online disinformation campaign following the release of a new product. Our Cybersecurity and Strategic Communications teams launched an investigation to gain a comprehensive understanding of the situation. The team identified behaviors and activities across multiple online platforms driving the conversation, and delivered a conclusive report that was referenced in a litigation matter. The report included the specific online accounts and posts at the center of the disinformation campaign, resulting in multiple online personas acknowledging they were paid to post the negative content that was amplified to go viral.
