Our Latest Threat Intelligence

The ongoing events in the Middle East shine a bright light on the immediate, complex, and interlinked nature of geopolitical and cybersecurity risks, which can extend far beyond the epicenter of the crisis and impact many parts of a business.

To stay informed and vigilant, read our latest Cyber Threat Intelligence Alert on the Iran conflict. The alert contains an overview of the Iranian escalation, the cyber risk outlook by region and sector, observed tactics and techniques, and recommended actions to mitigate cyber risk. Service Spotlight

Why It Matters:
As artificial intelligence (AI) becomes increasingly embedded in business operations, organizations face a rapidly evolving and complex regulatory landscape. Frameworks such as the EU AI Act, the Colorado AI Act, and global standards like NIST AI Risk Management Framework (RMF) and ISO 42001 are imposing new compliance obligations on companies that develop or deploy AI systems. Failure to address these requirements exposes organizations to significant legal, operational, and reputational risk.

How FTI Consulting Can Help:
FTI Consulting brings deep expertise in AI regulatory compliance, supporting clients across the full AI lifecycle using a structured approach anchored in the NIST AI RMF. Our methodology harmonizes multiple regulatory requirements into a single, scalable compliance program, reducing duplication efforts and enabling organizations to adapt as the regulatory landscape evolves.

Success Story:
A telehealth organization engaged our experts to develop a responsible AI compliance program as it began integrating AI into its products and services. Using the NIST AI RMF, we conducted a maturity assessment, inventoried existing and future AI systems, and identified key risks and gaps across the EU AI Act and Colorado AI Act, delivering a remediation roadmap and operational workflows to manage AI risk and meet regulatory obligations.
